

GRE Subject Math - 6 Weeks Study Schedule

SubjectMath.com

Introduction

- The study schedule places the modules with practice tests in a schedule designed to prepare for the test of April 2022.
- The schedule assumes that the student has SubjectMath practice tests #1 and #2, together with two original test examples from ETS. (At least one is published on ETS's website)
- Notes for a day dedicated to a practice test:
 - Prepare a simulating environment (no phones, use pencils, write on an answer sheet, time the test, etc...)
 - Start the practice test on the same time as the actual test.
 - Take a one hour break when test ends.
 - Spend the rest of the day going over the answers and redoing the problems which you got wrong.
